Tear the first outbreak in Europe, for the season, should have been in poor down-trodden Poland, was hardly to be expected in view of the more threatening aspect of other countries. A similar demonstration of national feeling would have appeared to be only a matter of course in Rome or Venice, where a hope of the future is kept alive by some encouraging circumstances. A movement of netual resistance to Austrian authority in Hungary or among the adjoining populations, would seem to have been more probable, than even a peaceful commemo ration by the Poles of events that must remind them of their claims to national independence Indeed, nothing would be less surprising than such a resistance in Hungary. The new constitution, which has been promulgated, " to answer the emergency of the moment," as Count RECHBERG informed them, has failed to satisfy the population; and especially the Hungarians, who declare positively that they will not send their representatives to the Central Diet at Vienna; and who treat the orders and inhibitions of the House of Hapsburg with the utmost con-

A Word of Cantion.

The has been estimated that over Two Husdred Thouses and Dollars are paid to awindling quarks sinually, in New England abuse, without the least benefit to those who pay it. Most of this amount is paid by a class of porwans who are the least able to lose it, and yet they are composited to for the wrong in silence, not daring to expose the cheat to war of exposing themselves. All this comes from requesting to man whose dustrees is lo deceive, and whose only recommendation is their cost false and extravagant enterprise process of themselves. I. F. w. The stomach is affected with loss of appetite and sickness, the bowels in general are costive, sometimes alternative with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful sensation of having left undone something which ought to have been done. A slight, dry cough is some-times an attendant. The patient complains t weariness and debility; he is easily startled, his feet are cold or burning, and he com-plains of a prickly sensation of the skin his spirits are low; and although he is satis fied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to tey it.
